

# Safe delivery through best practice

## Human Factors roles within our Nuclear business • Knutsford, Cheshire

AMEC is a focused supplier of high-value consultancy, engineering and project management services to the world's natural resources, nuclear, clean energy, water and environmental sectors. With annual revenues of over £2.5 billion, AMEC designs, delivers and maintains strategic and complex assets for its customers. The company employs some 23,000 people in more than 40 countries globally.

As the demand for our expertise continues to grow, there are opportunities for Human Factors Consultants to join our team in the UK and for potential overseas assignments.

We are interested in hearing from Human Factors professionals with demonstrable knowledge and experience of a range of human factors principles and methods, particularly as applied within the nuclear industry.

We are also particularly interested in recruiting senior Human Factors Consultants with knowledge and experience in either of the following areas for potential assignments in Western Europe:

- Safety culture theory and practices; the development and implementation of key management systems and processes which support strong safety culture and safety culture enhancement;
- Human Factors engineering support to major nuclear design or refurbishment projects, preferably in a technical leadership role.

If you believe you have the necessary knowledge, experience and enthusiasm to succeed in one of these positions, we would like to hear from you. In return you can expect a competitive salary and comprehensive range of benefits. As you would expect from a FTSE-100 company, there are excellent opportunities for personal and professional development.

Please send your CV and covering letter to **Steve Smith** – [steve.smith5@amec.com](mailto:steve.smith5@amec.com) or call Steve for a confidential discussion on **01565 684493**.
